WARRANTY INFORMATION

Ironman 4x4 warrants the original buyer, only when purchased new via authorised Ironman 4x4 resellers and distributors, from date of retail sale.

Product is warranted against defects in material or workmanship that cause the product to perform below the specified limits set by Ironman 4x4, to the extent that Ironman 4x4 will repair or replace any parts which are found to be defective.

All warranty claims must be submitted via original purchasing store or chain, unless otherwise arranged.

Proof of original purchase must be presented upon request.

Products may require to be returned to Ironman 4x4 for assessment or repair. Postage and removal costs involved are not the responsibility of Ironman 4x4, and may only be considered upon discretion by Ironman 4x4 in the event of such claim being verified.

The warranty does NOT apply where, 1) acts of neglect or misuse are evident, 2) product has been modified, 3) vehicles which are modified or not the recommended vehicle of use, 4) used in racing or competition conditions without the prior consent of Ironman 4x4, 5) used beyond the expectations of the original vehicle manufacturer.

Before installation of any product, please ensure you have received the correct parts for your application.

Ordering of the correct parts is the responsibility of the buyer. Return of a product in an un-used condition will attract a 15% restock fee, where Ironman 4x4 is not at fault.

Return of used or soiled product, 1) outside warranty period, 2) without fault, will result in refusal of your claim and be returned at buyer's expense.

SUSPENSION:

All suspension products must undergo safety check at 500km after fitment. Fitment should be performed by an authorised or licensed mechanic, competent with suspension installations.

Special tools may be required when fitting some parts including struts. Damage to products through fitment error is not covered under warranty.

Warranty may become void when product is installed in conjunction with anything other than genuine manufacturer or Ironman components.

Where required, Ironman 4x4 recommend wheel alignment after fitment of any new suspension component. Obtaining wheel alignments is the responsibility of the buyer.

FREIGHT CONDITIONS:

Freight of all products is the buyer's responsibility.

Where Ironman 4x4 have arranged freight, costs involved will be invoiced to the buyer.

Ironman 4x4 is not responsible for damage or loss during freight.

FITTING:

All prices listed may be subject to fitting costs. The price of fitting is determined by the individual fitting agent.

NOTES

NOTES

PART SELECTION

Choosing The Right Spring

Leaf Springs: Part number suffix A. (eg. TOY057A)

Will provide some lift from standard and used where comfort is preferred rather than firm control. This design is best suited to light or no load applications.

Coil and Leaf Springs: Part number suffix B. (eg. TOY025B)

Ride will be firmer than original by around 20% and suits light to medium loads. This spring is recommended when the given load may be occasional or temporary. Excellent for vehicles which have some accessories fitted.

Coil and Leaf Springs: Part number suffix C. (eg. TOY025C)

Will provide excellent support for vehicle's carrying constant heavy loads. Suitable when multiple heavy accessories or steel tray's / toolboxes fitted. These springs should be avoided when vehicle has light or no load present.

Leaf Springs: Part number suffix D. (eg. TOY009D)

Extra heavy duty springs designed to support heavier constant loads when heavy accessories are combined with heavy payloads

Choosing The Right Shock Absorber

Nitro Gas: Part number suffix GR.

Twin Tube 35mm Bore and Piston.

These shock absorbers are best suited to medium and heavy loads. Vehicle will become firmer and more responsive. Will provide excellent resistance to body roll when cornering.

Nitro Gas Soft Ride: Part number suffix GRC.

Twin Tube 35mm Bore and Piston

These shock absorbers are available for selected vehicle's where comfort is preferred rather than firm control. The softer valving is best suited to light or no load applications.

Foam Cell: Part number suffix FE.

Twin Tube 41mm Bore and Piston.

These shock absorbers provide similar benefits to the Nitro Gas GR shock absorber. The Foam Cell shock absorber features larger piston and bore size to allow for more oil capacity which allows the shock absorber to operate cooler in rough offroad conditions or long haul corrugations

How Much Lift Will I Get?

All Coil and Leaf Springs are accompanied by a suggested weight range throughout this catalogue.

This suggestion is provided as an assistance to spring selection and is not indicative of the springs full ability.

The stated lift for each vehicle is relative to the suggested weight loading and is based upon the minimum value of this suggested weight loading.

The lift heights quoted are a general figure only, calculated as an average of both Front and Rear, and are relative to new vehicle ride heights. The position of added weight can also affect the outcome.

Which Kit Do I Choose?

The correct selection of a suspension kit is vital to a successful outcome.

Each vehicle should be treated as an individual case, as many variables can affect the final result.

When assessing a vehicle and choosing a kit, the following must be noted:

- *Engine type, Petrol, Diesel, Turbo Diesel? Perhaps an engine conversion which is heavier than the original?*
- *Added accessories such as bull bar, winch, second battery, extra spare wheel, drawer system, roof rack, steel tray, sub tanks etc. can all alter the outcome.*
- *Take note the location of these accessories as the re-location can also disrupt the weight balance.*
- *Carefully note the production date and series of the vehicle as many parts may differ from model to model.*
- *Understand the usage of the vehicle, such as how and where the vehicle will be driven. - eg. different terrains and speeds.*

The Ironman suspension kit part numbering system is constructed as follows:

Customising The Kit

Generally, as no two vehicles are alike, customizing a suspension kit is recommended and can be discussed with the Ironman team.

For example:

A listed suspension kit, eg. TOY010BKG2 will have B springs supplied front and rear by default. This may not be suitable for a vehicle that carries heavy load in the rear only. In this case we would suggest C rear springs but front will remain the B.

Kit customisation is relevant when selecting springs and shock absorbers only. This service is only available upon request.

NOTE: Image above indicates kit contents.

**Unnecessary fitment of Trim Packers may lift vehicle too high.
 It is also essential to select the correct front coil springs to
 maintain a minimum of 60mm downward suspension travel.**

Products listed on page 94 -95 may not be legal for road use and are strictly intended for off-road competition use only. Certification may be required for on-road use.

The above products are not covered by the Ironman warranty policy.

Further vehicle modifications may be necessary. Such modifications are entirely the owners responsibility. Ironman accept no responsibility for any damage or injury caused by use of the above products.

* Vehicles manufactured pre 8/1991 result in 20mm lower lift than post 8/1991.

¹ Landcruiser with two Front Brake Hoses, order extra BHOSE002 for Front.

² 80 Series may have SBEXT002 or SBEXT005, 105 Series will use SBEXT005. 80 Series must check your Rear Sway Bar Bracket before ordering.

Accessories (Excluding Winches) - 1 Year Warranty.

Winches - 3 Years Warranty.

Ironman 4x4 warrants the original buyer, only when purchased new via authorised Ironman 4x4 resellers and distributors, from date of retail sale.

Product is warranted against defects in material or workmanship that cause the product to perform below the specified limits set by Ironman 4x4, to the extent that Ironman 4x4 will repair or replace any parts which are found to be defective.

All warranty claims must be submitted via original purchasing store or chain, unless otherwise arranged.

Proof of original purchase must be presented upon request.

Products may require to be returned to Ironman 4x4 for assessment or repair. Postage and removal costs involved are not the responsibility of Ironman 4x4, and may only be considered upon discretion by Ironman 4x4 in the event of such claim being verified.

The warranty does NOT apply where, 1) acts of neglect or misuse are evident, 2) product has been modified, 3) vehicles which are modified or not the recommended vehicle of use, 4) used in racing or competition conditions without the prior consent of Ironman 4x4, 5) used beyond the expectations of the original vehicle manufacturer.

Before installation of any product, please ensure you have received the correct parts for your application.

Ordering of the correct parts is the responsibility of the buyer. Return of a product in an un-used condition will attract a 15% restock fee, where Ironman 4x4 is not at fault.

Return of used or soiled product, 1) outside warranty period, 2) without fault, will result in refusal of your claim and be returned at buyer's expense.

Damage to products through fitment error is not covered under warranty.

FREIGHT CONDITIONS:

Freight of all products is the buyer's responsibility.

Where Ironman 4x4 have arranged freight, costs involved will be invoiced to the buyer.

Ironman 4x4 is not responsible for damage or loss during freight.

FITTING:

Any prices quoted may be subject to fitting costs. The price of fitting is determined by the individual fitting agent.
